

COMPANY DESCRIPTION

WALLRAM will be represented with the global team on the Metpack to present the know-how of one of the most experienced providers in the area of Can Tooling and Engineering. In addition to the known range of first-class quality tooling for the production of metal packaging, a focus is on environmentally friendly solutions for re-use and refurbish of tooling and the latest developments regarding the optimal use of different materials. Whether it is about different types of carbide (including lightweight carbide) or about the use of various ceramics for tooling – WALLRAM offers the needed expertise.

The WALLRAM Group specialises in hard material applications, offering products and services for different business areas.

Our main focus is on the metal packaging industry, with production sites in Germany, Poland, US and WALLRAM Grindtec (LIZZINI Precision Grinding Machines) in Italy and WALLRAM GrindTec (Die Working Machines) in Germany.
